Risks & Recommendations

Frequency of Cleaning		
Heavy Use	12-16 hours per day	3 monthly
Moderate Use	6-12 hours per day	6 monthly
Light Use	2-6 hours per day	12 monthly

The above table shows the typical cleaning intervals required for kitchen extract systems as stipulated in TR19. The number of annual cleans required depends on several factors such as the level of usage of the cooking equipment, types and quantity of cooking and other risk factors such as the vulnerability of the system to ignition.
