## Deep Clean Specification – Appliance Only

### Project Lifecycle

### Deep Clean Procedure: (Appliances Only)

1. **Survey** Free of charge
2. **Method Statement –** Detailing works procedure
3. **Isolate equipment**
4. **Photographic evidence** taken prior to work commencing
5. **Cleaning Process**
  - **Appliances** – Cleaned internally and externally.
  - The equipment will be pulled out from place of situ.
  - The heavy soiled areas such as the grilles, griddles and solid top ovens scraped to remove the carbon deposits.

- The engineers dismantle ovens and equipment and leave the parts to soak in a powerful bath of decarbonising solution throughout the cleaning process.
- The internal appliances scraped to remove heavily soiled carbon deposits.
- Degreasing solution used to break down the grease within the appliances.
- High pressure steam equipment used to provide the system with a thorough clean and disinfection.
- Exterior appliances and equipment cleaned using degreasing solutions and various manual hand tools and equipment.
- Exterior polished using a stainless steel polishing solution.
- **Reassembly** – All appliances and parts returned to their original location. Isolators turned back to the original position

## 6. Completing the process

- **Photographic Evidence** - Photographic evidence taken on completion of the job.
- **Job Completion Sheet** – Job sheet signed off by designed person (Head Chef/Maintenance Manager)

## 7. Completion Report

- Inclusive of photographic evidence along with risks and recommendations.
- Report sent via email in PDF and can also be accessed on Eurovents website with your unique reference number.

## 8. Certification

- Cleaning certificate supplied on completion of Deep Clean with recommended date for subsequent cleans.
